

*This recipe makes about 3 pumpkin bath bombs.*

## Directions:

1. In a large mixing bowl, combine the baking soda, citric acid and Epsom salt. Mix well, making sure to break up any clumps.
2. Drizzle the pumpkin spice extract onto the powders, making sure to distribute it throughout. Mix again.
3. If you want to make green stems, set aside a small portion of the baking soda mixture in a small mixing bowl.
4. Mix 2 drops each of red and yellow food coloring and add to the large mixing bowl. And add 1 drop of green food coloring to the small mixing bowl. Distribute the color throughout the ingredients.
5. Using a dropper, slowly add the melted coconut oil to each baking soda mixture and mix quickly. If needed, add additional coconut oil until the mixture is moldable.
6. Once your mixture is moldable, pack the baking soda mixture tightly into your mold. Place the spider toy in the middle then continue packing the mixture, applying pressure to the center.
7. Allow to dry for 3-4 hours or preferably overnight.

## How To Use:

Drop one bath bomb in a warm bath. It releases a yummy fall scent of pumpkins, cinnamon, ginger and vanilla — your bathroom will smell ah-mazing! It also gives the water a soft orange and green hue while slowly revealing the spooky spider inside. Eek!

Store your bath bombs in a cool, dry place.
